The Japanese Ships of War.
The Senate some time age called upon the
President, by resolution, to inform them
whether any communicates, representative, or whether any comin balones, representative, or agent of our Government has been engaged by the Japanese to construct for them ships of war. The response to this inquiry shows that our Minister, Mr. Pruyn, was requested by the Minister for Foreign Affairs, to have built, in the United States, for that Government, two steam sloops of war, twenty-four heavy guns each, and one steam gunboet, also with heavy guns. Mr. Pruyn says he induced to take the order, hoping and expecting on its strival home that the rebellion would be crushed, and that it would supply work to our and sympathetically to their howlings dast the Government. It were better if the Japanese had appointed their own agents, his impressions being adverse to having our Government, or its representative, involved in these trainactions. Otherwise he has no objection to the proposed measure, so fix as the Navy Department is consermed.

Mr. Severa, Jan. 20, writes to Mr. Praya:

FROM VICKSRURG

A SAD SCARE DOWN THE RIVER.

Caino, Feb. 9.—A gentleman from Vinis-burg says, if the gunboats were so disposed they could run past the upper hatteries and take position in front of the leading streets, where they would be out of range of the bat-teries, and shell the city effectaally without themselves being in any danger.

It is to be heped the brilliant schlerement of the wooden run will site our iron clade up and induce them to leave their sung anchor-age up the Fasco.

moraing, that work is still going on sapidly on the canal, with a good prospect of success. Large dredges from Lovisville were soon expected there to sasist in the digring. Another inlet or mouth is being eat directly in a line with the current of the river, and the whole canal widened and deepened. Active operations are not likely to be commenced for some time. It is supposed that the object is to make the canal of sufficient depth to allow of the passage of the gimbouts and transports through, when the hattery at Vicksburg commanding the mouth of the canal will be tiltened, and the whole feet proceed to co-operate with Banke. In the attack upon Fort Rindson, which, it is believed, can be easily carried by an attack from the north. The combined forces will then attack vicksburg, landing the troops at a point south of the city, cutting off their communication with Jackson and attacking them is nearly an opposite direction from that made by Gen. Shorman.

The health of the troops is represented as very bod, large numbers dying daily, and the sick enfiring much from an leastfleaded supply of medicines. The 36d Wisconsin left Memphia with 500 cits-otter men, and can now hardly mitter 300. Many of these are not dangerously ill, but from their long continuents on the transports, and want of proper treatment, have become until for duty. Many other requested

Butterfield, as Chief of Staff, is well liked. Some few infirmate surprise that a purely volunteer officer should be chosen for such a position. It is true he didjent graduate at West-Point, but he has one of the most comprehensive and executive military minds in the army, combined with a butiness talent and energy which is inextanucible. He has already surpassed even his chief by the Scility with which he selece and masters the details of his position. He bose this reputation when at the head of his old brigsde, where he was noted for having everything at his fingers' ends. He entered the three months' service as colohel of the 18th New York State Millita, was subsequently made Brigsdier General of volunteers, and as the commander of a brigade, division and corpe has been found equal to his position. The REATING MAYOR AT WASHINGTON PARK.—The grand Skating Match at Washington Fark, weather permitting, will come off Jones day this week, to be amounced in the papers. The match is for a pair of ladies and a pair of gentlemen's allver mounted akaies. The Committee will be composed of elergymen emisent for their advocacy of miscular Christianity, one or two prominent lawyers and gentlemen interested in educational matters. As they are all staters, it is presumed they are competent Judges. The test will probably be not only fast skating, but elegant and graceful skating. In fine, the one who can kisse the bast, both in speed and appeal segies, will probably sweep the board.

they will pass muster. Their deviliry was so quietly planned, and so rapidly executed, that nees of the officers were sware of any disturbance, until the affair was over and the crowd dispersed.

This diagraceful affair is undergoing a thorough investigation by the officers of the several regiments in camp, and from what we know of Gen. Ammen, Col. Cameron, Capt. Phillips, and the officers generally, we are satisfied that the percentators will be summarily

The Ree Question.

Ice for domestic use can no longer be considered a luxury; it has become a necessity in the family of almost every citizen. The business is large and lucrative, and the public have a right to require that the article farnished shall be good. That ice taken from a cess pool is unfit to cool our drinks, needs no argument. If dealer attempt to distribute such ice to their enstoners, the authorities ought to stop it summarily for the same reason that the sale of 'exite dying by disease is forbiden by stringent penalties.

Within the last three or four days the leading ice firms of the city have been outling and filling their houses with hundreds of tons
